

placeholder — swap this file

Portfolio Sample

digital marketing, done well

This is a placeholder file so the download button on your marketing.html page works right away instead of 404ing.

Replace it with a real case study, before/after write-up, or portfolio deck whenever you have one ready — upload a PDF with this same filename (marketing-portfolio-sample.pdf) into the files/ folder to swap it, or update the filename in marketing.html if you'd rather use a different name.
